Weight	80 g
Housing	ABS + PC
Protection	IP65, manufacturer-stated dust and water resistance; not for immersion
Mounting	Detachable rail; 360-degree rotating clip

Configuration notes

This sheet covers the T1 configuration illustrated on the current SPIKECAM product page. Earlier T1 documents may describe a different hardware revision.

The illustrated retail configuration includes a 64 GB card. Agree supplied storage and accessories for a volume or OEM order. Storage-duration estimates depend on bitrate and are separate from battery duration.

Dock and desktop software compatibility remain configuration-specific. Request model-specific protection documentation where required.

Wi-Fi is supported. Frequency band, app and wireless operating modes require configuration confirmation. Weight and dimensions reflect the owner's latest specification.
